MODULE

PROGRESS

	<div>Introduction to Academy</div> <div>8 SectionsFundamentalGeneral</div> <div>This module is recommended for new users. It allows users to become acquainted with the platform and the learning process.</div>	<div>100% Completed</div> <div></div>
	<div>Network Enumeration with Nmap</div> <div>12 SectionsEasyOffensive</div> <div>Nmap is one of the most used networking mapping and discovery tools because of its accurate results and efficiency. The tool is widely used by both offensive and defensive security practitioners. This module covers fundamentals that will be needed to use the Nmap tool for performing effective network enumeration.</div>	<div>100% Completed</div> <div></div>
	<div>SQL Injection Fundamentals</div> <div>17 SectionsMediumOffensive</div> <div>Databases are an important part of web application infrastructure and SQL (Structured Query Language) to store, retrieve, and manipulate information stored in them. SQL injection is a code injection technique used to take advantage of coding vulnerabilities and inject SQL queries via an application to bypass authentication, retrieve data from the back-end database, or achieve code execution on the underlying server.</div>	<div>58.82% Completed</div> <div></div>
	<div>Web Requests</div> <div>8 SectionsFundamentalGeneral</div> <div>This module introduces the topic of HTTP web requests and how different web applications utilize them to communicate with their backends.</div>	<div>100% Completed</div> <div></div>
	<div>JavaScript Deobfuscation</div> <div>11 SectionsEasyDefensive</div> <div>This module will take you step-by-step through the fundamentals of JavaScript Deobfuscation until you can deobfuscate basic JavaScript code and understand its purpose.</div>	<div>100% Completed</div> <div></div>
	<div>Login Brute Forcing</div> <div>11 SectionsEasyOffensive</div> <div>Learn how to brute force logins for various types of services and create custom wordlists based on your target.</div>	<div>27.27% Completed</div> <div></div>
	<div>SQLMap Essentials</div> <div>11 SectionsEasyOffensive</div> <div>The SQLMap Essentials module will teach you the basics of using SQLMap to discover various types of SQL Injection vulnerabilities, all the way to the advanced enumeration of databases to retrieve all data of interest.</div>	<div>27.27% Completed</div> <div></div>

 <h2>Introduction to Web Applications</h2>	<h3>Introduction to Web Applications</h3> <p>17 Sections Fundamental General</p> <p>In the Introduction to Web Applications module, you will learn all of the basics of how web applications work and begin to look at them from an information security perspective.</p>	100% Completed
 <h2>Getting Started</h2>	<h3>Getting Started</h3> <p>23 Sections Fundamental Offensive</p> <p>This module covers the fundamentals of penetration testing and an introduction to Hack The Box.</p>	34.78% Completed
 <h2>Penetration Testing Process</h2>	<h3>Penetration Testing Process</h3> <p>15 Sections Fundamental General</p> <p>This module teaches the penetration testing process broken down into each stage and discussed in detail. We will cover many aspects of the role of a penetration tester during a penetration test, explained and illustrated with detailed examples. The module also covers pre-engagement steps like the criteria for establishing a contract with a client for a penetration testing engagement.</p>	46.67% Completed
 <h2>Cross-Site Scripting (XSS)</h2>	<h3>Cross-Site Scripting (XSS)</h3> <p>10 Sections Easy Offensive</p> <p>Cross-Site Scripting (XSS) vulnerabilities are among the most common web application vulnerabilities. An XSS vulnerability may allow an attacker to execute arbitrary JavaScript code within the target's browser and result in complete web application compromise if chained together with other vulnerabilities. This module will teach you how to identify XSS vulnerabilities and exploit them.</p>	70% Completed
 <h2>Command Injections</h2>	<h3>Command Injections</h3> <p>12 Sections Medium Offensive</p> <p>Command injection vulnerabilities can be leveraged to compromise a hosting server and its entire network. This module will teach you how to identify and exploit command injection vulnerabilities and how to use various filter bypassing techniques to avoid security mitigations.</p>	8.33% Completed
 <h2>Using Web Proxies</h2>	<h3>Using Web Proxies</h3> <p>15 Sections Easy Offensive</p> <p>Web application penetration testing frameworks are an essential part of any web penetration test. This module will teach you two of the best frameworks: Burp Suite and OWASP ZAP.</p>	100% Completed
 <h2>Footprinting</h2>	<h3>Footprinting</h3> <p>21 Sections Medium Offensive</p> <p>This module covers techniques for footprinting the most commonly used services in almost all enterprise and business IT infrastructures. Footprinting is an essential phase of any penetration test or security audit to identify and prevent information disclosure. Using this process, we examine the individual services and attempt to obtain as much information from them as possible.</p>	14.29% Completed
 <h2>Information Gathering - Web Edition</h2>	<h3>Information Gathering - Web Edition</h3> <p>10 Sections Easy Offensive</p> <p>This module covers techniques for identifying and analyzing an organization's web application-based attack surface and tech stack. Information gathering is an essential part of any web application penetration test, and it can be performed either passively or actively.</p>	70% Completed

Web Service & API Attacks

13 Sections Medium Offensive

Web services and APIs are frequently exposed to provide certain functionalities in a programmatic way between heterogeneous devices and software components. Both web services and APIs can assist in integrating different applications or facilitate separation within a given application. This module covers how to identify the functionality a web service or API offers and exploit any security-related inefficiencies.

15.38% Completed

Bug Bounty Hunting Process

6 Sections Easy General

Bug bounty programs encourage security researchers to identify bugs and submit vulnerability reports. Getting into the world of bug bounty hunting without any prior experience can be a daunting task, though. This module covers the bug bounty hunting process to help you start bug bounty hunting in an organized and well-structured way. It's all about effectiveness and professionally communicating your findings.
